

Local Pages

Perfect Your Customer Experience with Perfect Local Pages

Rank Higher Online and Drive More Traffic to Your Stores

Chatmeter makes it easy for multi-location brands of any size to build beautiful, responsive Local Pages for every location. We'll help you rank higher by optimizing for unbranded keywords, voice search, and zero-click searches to drive traffic your way.

Building Local Pages is a Breeze

Create 1000s of local pages without hiring (or borrowing) extra resources. Build pages from a spreadsheet, a doc, a napkin — anything! Achieve the perfect on-brand look for all your pages AND integrate social media streams.

Chatmeter gets it done with:

- **Easy, open API integration**
- **Advanced analytics and reporting**
- **Quick syncs to Chatmeter's platform**

Landing Page Optimization — Easy to build pages with SEO, voice search schema markup, and accurate, robust local content.

Advanced Location Finder — Automatic geolocation and address search, branded pins, and advanced filtering mean that your customers get accurate information every time.

Perfect Pages — With a click, the bulk page creation tool publishes 1000s of local pages reflecting the unique information for every individual storefront.

We've Got the Technology and the Customer Support to Get You Where You Want to Go

Boost your search rankings and customer experience by adding voice assist features, interactive maps, and organic search optimization. Anytime you need customer support, our team is ready and waiting to help you create exceptional local pages, level up your unbranded keyword strategy, strengthen SEO, and attract the ideal buyers to your brand.

Case Study

A national franchise with 500+ locations struggled to provide its customers with consistent, accurate, and compelling online information. Chatmeter's Local Pages provided the solution:

- Each location got a search-optimized URL
- RDF and geographic location tags
- Integrated online ordering with business listing management

The results? This company saw a 128% increase in unique, organic search results and a 103% increase in online ordering interactions!
